Re: Preferred routing of the Able to Moody Transmission Lines

Dear Sirs,

We represent a large group of residents along the Rittenhouse corridor in Queen Creek.

We protest the placement of high tension power lines along the Rittenhouse corridor. This route would adversely affect many thousands of people who live and work in this area. (see signatures 1500 plus, collected and deposited with the SRP as of May 1st.).

We are in favor of the most northern route which is Pecos to Germann to Meridian, then back to the U.P. tracks. This route has very few residents and very minimally affects the airport which has less than 10 commercial flights daily.

The Ryan Rd. route still comes too close to many homes as it cuts back to Rittenhouse rd. just west of Hawes.

The thousands of lives affected by all but the Germann/Meridian route trump any airport inconvenience, also the burden would be shared by Queen Creek, Mesa, Gilbert and Pinal County.

Thank you for your consideration,

John Upshur
